

Using Civic Engagement, Practitioner Empowerment, and Policy Creation

Soil4Climate participates in community outreach at all levels including presentations to conferences, corporations, civic events and school groups around the world. We have presented in the United States, Canada, England, Zimbabwe, Kenya, France, Italy, and Morocco. In addition to traditional formats such as slide presentations, we also incorporate poetry and music. We have a theme song and music video, titled “Brand New Sky.”

Soil4Climate provides technical and financial assistance to practitioner organizations and young scholars seeking to improve on or monitor the impacts of soil carbon enhancing land management practices. In Africa we provided GPS mapping service and funds for soil carbon testing.

A group of nine people, including state legislators and community members, posing behind a large green sign that reads "Healthy Soils Act" and "Massachusetts H.3713". The group includes a woman in a "Miss United States" sash and a man in a "Mass Organic" shirt.

State	Title	Number
California	Healthy Soils Initiative	S.B. 32
Connecticut	An Act Concerning the Labeling of Topsoil Sold to Customers and the Carbon Content of Soil Sold in the State and Used for Regenerative Farming Purposes	H.B. 6976
Hawaii	Establishes the Carbon Farming Task Force	H.B. 1578
Maryland	Maryland Healthy Soils Program	H.B. 1068
Massachusetts	Healthy Soil Program	H.B. 3713
New York	Carbon Farming Tax Credit	A3261

Soil4Climate assists in policy formation and advocacy for legislation that enhances soil carbon. We've contributed to or spoken on behalf of legislation currently before the states of Massachusetts, Connecticut, and Vermont.
